SUMMARY

Full Stack Developer with 4 years of experience building web and desktop applications with React, Next.js, and NestJS. Proven track record of shipping end-to-end features — from API design and database integration to production front-ends — across government, enterprise, and product teams. Passionate about modern web technologies and leveraging AI tools to accelerate delivery. Open to Front-End, Back-End, or Full Stack roles.

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Dart, SQL

Frameworks & Libraries: React, React Native, Next.js, NestJS, Flutter, Express.js, Electron, Tailwind CSS, Ant Design, DaisyUI

Databases & Data Tools: PostgreSQL, Kibana, Firebase, Prisma, Supabase

DevOps & CI/CD Tools: Git Version Control, Jenkins, Vercel, Docker

Testing & API Tools: Postman, Jest, SonarQube, Playwright

Design & Collaboration Tools: Figma, Draw.io (Diagrams.net), ExpoGo, Slack, Lark, Discord

AI Tools: Claude Code, Cursor, Gemini, Google Gemini API, Z.ai, ChatGPT, Codex, lovable.dev, Antigravity, Stitch AI

Soft Skills: Creativity, Critical thinking, Responsibility, Problem solving, Communication, Teamwork

WORK EXPERIENCE

Full Stack Developer, iApp Technology

Feb 2023 - Present

Project: NBTC - Drone Data Transmission, Role: Backend Developer

- Built and deployed an API for transmitting drone data to mobile and web clients.
- Presented the API architecture and functionality directly to the client.

Project: ACT & ACT Phase 2, Role: Full Stack Developer

- Designed and built the data-ingestion workflow to fetch project & company data from 3 government sources (EGP, DBD, GOV) and store it in the database.
- Automated data-fetching pipelines with Jenkins, replacing manual execution.
- Developed Python logic for project risk assessment and Excel export for project/company data.
- Integrated Kibana and new database sources into the front-end views (MA data) and Built the Phase 2 front-end web views.

Product: iApp Speech Flow for Web, Role: Full Stack Developer

- Planned development and designed the code/workflow architecture for the web version.
- Ported the mobile codebase to a Next.js web application.
- Packaged the app as an Electron desktop build for macOS and Windows.

Project: iisi · Hub of Talent, Role: Front-End Developer

- Integrated role-data APIs from signup into editable views per design.
- Built the profile-like and profile-view flows connected to backend data.

Project: career-companion, Role: Front-End Developer

- Fixed front-end bugs and corrected faulty application behavior and Authored test-case documentation.

Project: digitaltouchpoint · Wellness Chatbot, Role: Full Stack Developer

- Built Next.js APIs for the signup flow and package-pricing CRUD.
- Implemented JWT authentication to secure user login and the signup process.
- Created a dashboard to display package and user information.
- Authored project documentation: user manual, security, performance, and test-case documents.

Product: iApp EKYB, Role: Backend Developer

- Built a Node.js data pipeline to extract records from designated sources with rate-limit handling and automated cookie management, designed the PostgreSQL schema to requirements, and ran load tests to determine source API limits
- Developed the eKYB REST API (Node.js, PostgreSQL, Redis) for search, risk scoring, and 5,000-ID batch lookup, with OpenAPI spec, tests, Jenkins + Docker CI/CD, and per-endpoint architecture documentation

Frontend Developer, Vertobase Company

Mar 2022 - Dec 2022

Product: Zignway App, Role: Front-end Developer

Tools: JavaScript, TypeScript, Next.js, Flutter, Git

- Implemented front-end UI from design using React and Next.js.
- Developed Flutter mobile features including the PIN-login flow.

EDUCATION

Bachelor of Engineering (Electronic Engineering)

2015 - 2020

Suranaree University of Technology Nakhon Ratchasima, Thailand

Graduated: July 2020
